1.Dheemahi Clinic

Specialized Care for Your Child's Neurological Health

At Dheemahi Clinic, we are passionate about ensuring every child has the opportunity to grow and thrive, no matter their neurological challenges. We provide expert care and support for children from infancy through adolescence, treating a wide range of brain and nervous system conditions with compassion and advanced medical expertise.

2.Meet Dr. Yatheesha B L

Your Partner in Paediatric Neurology

Dr. Yatheesha B L is a highly respected paediatric neurologist with years of experience dedicated to helping children with neurological and developmental disorders. His credentials speak to his commitment:

- **MBBS from M.S. Ramaiah Medical College**
- **Diploma in Child Health (DCH)**
- **Post-Graduate Diploma in Developmental Neurology**
- **Fellowship in Paediatric Neurology at Amrita Institute**

Dr. Yatheesha is deeply committed to providing personalized, patient-centred care that addresses each child's unique needs and challenges.

3.Our Expertise in Neurological Conditions

At Dheemahi Clinic, we specialize in treating both common and rare paediatric neurological conditions:

- **Epilepsy** – Advanced treatment to manage seizures
- **Chronic Headaches & Migraines** – Relief from persistent pain
- **Infections like Meningitis & Encephalitis** – Timely diagnosis and care
- **Developmental Disorders** – Supporting children with Autism, ADHD, and more
- **Intellectual Disabilities** – Helping children with learning challenges
- **Movement Disorders** – Addressing tremors, tics, and balance issues
- **Neuromuscular Disorders** – Care for nerve and muscle problems
- **Newborn Neurological Issues** – Early intervention for better outcomes
- **Neurodegenerative Conditions** – Comprehensive care for progressive disorders

We believe in a proactive, holistic approach to managing these conditions, ensuring your child has the best possible care.

4.When Should You See a Paediatric Neurologist?

Your paediatrician may refer you to a specialist if your child shows any of the following signs:

- Severe, frequent headaches

- Unexplained seizures
- Developmental delays
- Balance or walking difficulties
- Muscle weakness or abnormal movements
- Memory loss or unusual confusion
- Lack of sensation or tingling in the body

Early intervention can make a significant difference in your child's development.

5.State-of-the-Art Diagnostics & Treatment

At Dheemahi Clinic, we combine expert medical care with advanced diagnostic tools in our **Neurophysiology Lab**. Our lab is equipped to provide accurate tests and assessments for a range of neurological conditions. We also offer **Neurological Rehabilitation**, a specialized program designed to help your child recover from neurological injuries and conditions, improving their quality of life.

6.Why Choose Dheemahi Clinic?

- **Personalized Care** – Every child is unique, and so is their treatment. We tailor our care to fit each child's specific needs.
- **Compassionate Approach** – We understand the stress and worry that comes with a child's health concerns, and we're here to support your family every step of the way.
- **Experienced Specialist** – Dr. Yatheesha's extensive training and years of experience ensure your child is in the best hands.

7.Empowering Children for a Brighter Future

At Dheemahi Clinic, we don't just treat conditions; we help children live fuller, healthier lives. With the latest in medical treatments and a deep commitment to each patient, we are here to guide your child on their journey to wellness.
