DIGITAL GROWTH CHECKLIST

27 CRITICAL POINTS EVERY BUSINESS MUST AUDIT BEFORE SPENDING ON ADS

6	27	1
SECTIONS	CHECKPOINTS	SCORECARD

WHY THIS CHECKLIST EXISTS

Most businesses are invisible online — not because digital marketing doesn't work, but because they haven't fixed the fundamentals.

Every day, thousands of businesses spend money on ads, social media managers, and website redesigns — while ignoring the 27 foundational checkpoints that actually determine whether digital marketing works for them.

This checklist was built by the team at **Sunrise Digital** after working with over 100+ businesses across India. We've seen what separates businesses that get 10X ROI from digital marketing from those that burn their budget and give up.

Before you spend another rupee on ads, go through this checklist. Be honest. Check only what is **truly done** — not planned, not in progress. Done.

HOW TO USE THIS CHECKLIST

1. Go through all 27 checkpoints honestly
2. Tick only what is **fully implemented** — not planned
3. Count your total score at the end
4. Use the scorecard to find your growth stage
5. Prioritise gaps and take action within 7 days

Sections covered:

✓ Website Foundation
✓ Social Media Presence
✓ Lead Generation System
✓ Performance Marketing
✓ SEO & Online Visibility
✓ Analytics & Reporting

1 WEBSITE FOUNDATION

Is your website built to convert visitors into leads?

Your website is your 24/7 salesperson. If it isn't set up correctly, you're losing leads even before a single rupee is spent on ads.

#01 Mobile-First Design

Over 78% of Indian internet users browse on mobile. Your site must load fast and look flawless on every screen size.

Sunrise Tip: *Test on Google Mobile-Friendly Test tool. Fix within 48 hours if failing.*

#02 Page Load Speed Under 3 Seconds

Every 1-second delay costs you 7% in conversions. Compress images, use fast hosting, and enable browser caching.

Sunrise Tip: *Use GTmetrix or PageSpeed Insights. Aim for 90+ score.*

#03 Clear Above-the-Fold Headline

Within 5 seconds, a visitor must know exactly what you do, who you serve, and what they should do next.

Sunrise Tip: *Your headline should answer: 'What's in it for me?' — not 'Who we are'.*

#04 Primary CTA on Every Page

Every page must have one clear call-to-action: Call Now, Book a Demo, Get a Quote, Download Free Guide.

Sunrise Tip: *Use contrasting button colors. Test orange, green, or red buttons vs your brand color.*

#05 SSL Certificate & Trust Signals

HTTPS is mandatory. Add client logos, testimonial count, and certifications near the fold to build instant credibility.

Sunrise Tip: *Display Google reviews count, years in business, and client logos prominently.*

2 SOCIAL MEDIA PRESENCE

Are you showing up where your clients are scrolling?

Social media is your digital storefront window. Inconsistency kills trust. Silence signals you're out of business.

#06 Consistent Brand Identity Across All Platforms

Same logo, same color palette, same tone of voice on Instagram, Facebook, LinkedIn, and Google Business.

Sunrise Tip: *Use Canva brand kit or brief Sunrise Digital to create unified templates.*

#07 Minimum 3 Posts Per Week

The algorithm rewards consistency. Sporadic posting drops your reach to near zero within 2 weeks of inactivity.

Sunrise Tip: *Batch-create 12 posts in one sitting every month. Use a content calendar.*

#08 Video Content in Your Mix

Reels and short-form video get 3–5x more reach than static posts. Even 30-second tips outperform carousels.

Sunrise Tip: *Film 4 short videos monthly. No studio needed — good lighting + phone is enough.*

#09 Engagement Response Within 2 Hours

Replying to comments and DMs boosts algorithmic reach. Unanswered DMs are lost leads.

Sunrise Tip: *Set up auto-responses for FAQs on Instagram and Facebook using Meta Business Suite.*

3 LEAD GENERATION SYSTEM

Do you have a systematic way to capture and nurture leads?

Hope is not a strategy. If you don't have a structured lead capture system, you're leaving 90% of your potential clients on the table.

#10 Lead Magnet in Place

A valuable free resource (PDF guide, checklist, template, free audit) that exchanges contact info. This is your #1 list-building asset.

Sunrise Tip: *This very checklist IS a lead magnet. Create one for your niche immediately.*

#11 Landing Page for Every Offer

Every campaign, every free resource needs a dedicated landing page — not your homepage. Single focus = higher conversion.

Sunrise Tip: *A good landing page has: headline, benefits, social proof, and one CTA. Nothing else.*

#12 Email Automation Sequence

When someone gives you their email, a 5-email welcome series should go out automatically over 10 days building trust and making an offer.

Sunrise Tip: *Use Mailchimp or ConvertKit. Day 1: Welcome. Day 3: Value. Day 5: Story. Day 8: Offer. Day 10: Urgency.*

#13 WhatsApp Business Profile Optimised

In India, WhatsApp is the highest-converting follow-up channel. Set up auto-replies, catalogue, and broadcast lists.

Sunrise Tip: *Add WhatsApp chat button to website. 80%+ of Indian B2C leads prefer WhatsApp over email.*

4 PERFORMANCE MARKETING

Are your paid ads structured to generate profit, not just clicks?

Running ads without a proper setup is like pouring water into a leaking bucket. Fix the structure first, then scale the spend.

#14 Meta Pixel / Google Tag Installed & Verified

Tracking pixels must fire correctly on every page including thank-you pages. Without this, your retargeting and optimization are blind.

Sunrise Tip: *Use Facebook Pixel Helper Chrome extension to verify. Check Events Manager for active signals.*

#15 Conversion Goal Set Up in Ads Manager

Optimize for conversions (leads, purchases), not traffic. Traffic campaigns fill your analytics — conversion campaigns fill your pipeline.

Sunrise Tip: *Never run 'Traffic' campaigns for lead generation. Always use 'Lead Generation' or 'Conversions' objectives.*

#16 Audience Segmentation: Cold, Warm, Hot

Cold = interests-based. Warm = website visitors, video viewers. Hot = retargeting those who engaged. Each needs different creative and messaging.

Sunrise Tip: *Budget split: 50% Cold, 30% Warm, 20% Hot retargeting. Adjust monthly based on results.*

#17 A/B Testing Active on Ad Creatives

Always test 2–3 creatives per ad set. Image vs video, headline A vs B. Kill losers in 72 hours, scale winners.

Sunrise Tip: *Change only ONE variable per test. Never change copy AND creative at the same time.*

#18 Cost Per Lead Benchmarked & Tracked Weekly

You must know your CPL (Cost Per Lead), CPAcq (Cost Per Acquisition), and ROAS (Return on Ad Spend) at all times.

Sunrise Tip: *Build a simple Google Sheet dashboard. Update every Monday. Trend data reveals optimization opportunities.*

5 SEO & ONLINE VISIBILITY

Can your dream clients find you on Google without paid ads?

SEO is the compounding interest of digital marketing. Every blog post, every optimised page, every backlink pays you back for years.

#19 Google Business Profile Fully Optimised

GBP is your free listing that appears in local search and Google Maps. Complete every field: photos, services, hours, posts, Q&A.;

Sunrise Tip: *Post on GBP once a week. Respond to every review — positive and negative — within 24 hours.*

#20 Target Keywords Defined for Each Service Page

Every service page must target 1–2 specific keywords. 'Digital marketing agency Pune' beats 'digital marketing' every time.

Sunrise Tip: *Use Google Keyword Planner (free). Target keywords with 100–1,000 monthly searches and low competition first.*

#21 Blog with Minimum 2 Posts Per Month

Each blog post is a new entry point into your website from Google. Solve one specific problem your ideal client searches for.

Sunrise Tip: *Write about: 'How to [solve pain point]' and '[Your service] vs [alternative]'. These rank fastest.*

#22 Page Titles & Meta Descriptions Customised

Every page must have a unique title tag and meta description with the target keyword. Generic titles get skipped in search results.

Sunrise Tip: *Title format: [Keyword] | [Brand Name] — under 60 characters. Meta: 150-160 characters with a CTA phrase.*

6 ANALYTICS & REPORTING

Do you actually know what's working and what's wasting your budget?

You cannot improve what you don't measure. Without data, you're guessing — and guessing costs money.

#23 Google Analytics 4 Installed & Goals Configured

GA4 must track: page views, time on site, bounce rate, form submissions, and phone call clicks at minimum.

Sunrise Tip: *Set up 'Contact Form Submitted' and 'Phone Click' as Key Events in GA4. These are your real business metrics.*

#24 Monthly Performance Report Review

Schedule a monthly 30-minute review of: website traffic, lead volume, CPL, conversion rate, top-performing content.

Sunrise Tip: *Sunrise Digital provides detailed monthly reports. Use them to make next month's decisions — not gut feel.*

#25 Heatmap or Session Recording Active

Tools like Hotjar or Microsoft Clarity show where visitors click, scroll, and drop off — revealing exact UX problems.

Sunrise Tip: *Free forever on Clarity. Install today. Review recordings weekly to spot friction points on your key pages.*

#26 Competitor Performance Monitoring

Know what ads your competitors are running, which keywords they rank for, and what content is working in your niche.

Sunrise Tip: *Use Meta Ad Library (free) to see competitor ads. Use Ubersuggest for keyword gap analysis.*

#27 Quarterly Strategy Review & Pivot

Every 3 months, review your entire digital strategy. What's working? What's changed in the market? What should you stop doing?

Sunrise Tip: *Book a quarterly strategy session with Sunrise Digital. Markets shift fast — your strategy must shift faster.*

TOTAL SCORE

Add up your checked boxes. Write your score here:

My Score: _____ / 27

YOUR SCORE CARD

Count your checked boxes and find your growth stage

0–8	**CRITICAL ZONE**	Your digital presence is losing you business daily. Start immediately.
9–14	**NEEDS WORK**	Foundation gaps are limiting your growth. Fix priorities now.
