Dream clients — who they are

Segment 1

SME Business Owners

Founders of small-to-mid businesses in Bangalore spending ₹20k–₹2L/month on marketing. Frustrated by zero ROI from their current agency.

- Age 28–45, revenue ₹50L–₹10Cr
- Retail, F&B, healthcare, real estate, edtech
- Wants leads, calls, walk-ins — not just likes
- Has tried boosting posts with no results

Segment 2

Marketing Managers

In-house marketing head at a mid-size company. Needs to show ROI to their CEO. Wants a vendor who understands performance.

- Age 25–38, corporate or startup setting
- IT, FMCG, healthcare, education sectors
- Needs reports, dashboards, accountability
- Budget approval already done — just needs trust

Segment 3

Political / Government Clients

Candidates, NGOs, government departments needing mass outreach, election campaign management, and public awareness campaigns.

- Proven track record (Shivamogga 2019)
- Needs hyper-local targeting
- WhatsApp + social + OOH combo

Segment 4

Startups & D2C Brands

Early-stage startups and direct-to-consumer brands wanting fast growth, brand presence, and performance funnels.

- Series A or bootstrapped, age 22–35
- Wants growth hacking + brand identity
- CakeZone-type clients — food, lifestyle, app

- Needs funnels + creatives + ads all-in-one

Where to find them

LinkedIn

Target by job title: Founder, CEO, Marketing Manager. Use LinkedIn Lead Gen Forms. Bangalore + Shivamogga radius targeting.

Instagram & Facebook

Lookalike audiences from past clients. Retarget website visitors. Use Reels with case study hooks — "How we got X leads in 30 days."

Google Search

Capture high-intent buyers. Keywords: "digital marketing agency Bangalore", "lead generation agency", "performance marketing Bangalore."

WhatsApp & Referrals

Build a referral chain from happy clients. WhatsApp broadcast list for nurturing. Create a WhatsApp Business catalog of services.

BNI / Chambers

Attend Bangalore BNI chapters, CII events, TiE meetups. Host free "Digital Audit" workshops at business associations.

YouTube Ads

Run pre-roll ads targeting business channel viewers. Show results, testimonials, and the "Digital Audit" offer.

Core Identity — Who You Are

Big Domino Statement (one belief that makes everything else true): *"If a Bangalore business doesn't have a real digital strategy — not just boosted posts — they are invisibly losing revenue every single month."*

Core Values to lead with:

- Results, not vanity metrics (no fluff, only ROI)
- Local expertise (we know Bangalore, Shivamogga, Karnataka businesses deeply)
- Speed to execute (no 6-week onboarding delays)
- Transparency (you always know where your money goes)

🎯 Audience — Who They Are & Where to Find Them

Primary audiences:

Clinic/hospital owners and healthcare professionals in JP Nagar, Jayanagar, HSR Layout. Restaurant and cloud kitchen founders launching on Swiggy/Zomato. Real estate developers and interior designers in Whitefield and Sarjapur. D2C brands and e-commerce founders trying to reduce Meta ad costs. Professional service businesses — CA firms, law firms, coaching institutes.

Where to find them:

On Instagram they're following business coaches, consuming motivational content late at night (9–11pm is peak). On Facebook they're in local groups like "Bangalore Entrepreneurs" and "Startup Bangalore." On LinkedIn they're looking for growth strategies. On Google they're searching "digital marketing agency Bangalore," "social media marketing for hospitals," "performance marketing agency Bangalore." On YouTube they're watching "how to run Facebook ads" videos because they tried it themselves and failed.

🪝 The Hook — Your Headline Formula

For landing pages and ads, use this structure:

"How [niche] businesses in Bangalore are getting [specific result] in [short timeframe] without [their biggest fear]"

Examples:

- "How Bangalore clinics are booking 40+ new patients/month without spending on hoardings"
- "How Bangalore restaurants doubled delivery orders in 60 days — without hiring a marketing team"
- "The exact system we used to help CakeZone dominate social media in Bangalore"

🧲 The Bait — Lead Magnet Ideas

PDF options (pick one per funnel):

"The Bangalore Business Owner's Digital Growth Blueprint" — a 12-page PDF covering why most local businesses bleed ad money, the 3-part system (traffic + conversion + retention), and a 30-day action plan. This is your main bait.

"The 7 Deadly Digital Mistakes Bangalore Businesses Make" — a short, punchy problem-awareness doc. Works great for cold audiences.

"The Social Media Audit Checklist" — a 1-page fillable PDF. Low commitment, high opt-in rate. Ideal for warm retargeting audiences.

PPT / Mini-Course concept:

A 5-slide/5-video mini course called "Digital Ready in 30 Days" — one short video per day covering: why your competitor is outranking you, what a real funnel looks like, the content formula that works for Indian audiences, how to read your ad results, and how to brief an agency properly. This builds massive authority and trust before you ever get on a call.

📄 Landing Page Structure (for social media traffic)

Above the fold: big bold headline, one sub-headline naming the audience, and the opt-in box with name + WhatsApp/email. Nothing else. No nav bar.

Below the fold: three pain bullets ("Does this sound familiar?"), then three promise bullets ("Here's what changes"), then social proof (client logos + one short testimonial), then repeat the CTA.

Footer: trust signals only — "Used by 100+ Bangalore businesses," your Google rating, and "No spam. Unsubscribe anytime."

💰 OTO Stack (One-Time Offers)

OTO 1 — The Free Audit (₹0): Immediately after opt-in, offer a "Free 20-minute Digital Audit" call. This is not a sales call — position it as a diagnostic. This is your primary conversion mechanism into paid work.

OTO 2 — The Starter Pack (₹4,999): A done-for-you 30-day social media starter kit — 12 designed posts, 1 reel script, a content calendar, and a basic ad setup. Low price removes risk and gets them in the door as a paying client.

Downsell — The DIY Kit (₹499): If they decline OTO 2, offer a DIY template kit — Canva social templates, caption formulas, and a posting schedule. They pay a small amount, feel they got value, and you get them in your ecosystem for an upsell later.

📧 Nurture Sequence (5-email flow)

Day 0: Deliver the lead magnet + your origin story (why Sunrise Digital exists). Day 2: Share a specific client case study with before/after results. Day 4: Educate — "Why boosting posts is costing you money" or "Why most agency campaigns fail." Day 6: Social proof — testimonials, client logos, results screenshots. Day 8: The call to action — book your free audit, limited slots this week.

Every email ends with a P.S. that contains the CTA link again. That's the most-read part of any email.

📊 Performance Marketing Funnel (for paid ads specifically)

Cold traffic sees: a problem-aware video ad (15–30 seconds) → lands on the squeeze page → gets the lead magnet.

Warm retargeting (visited but didn't opt-in): show a testimonial/case study ad → back to squeeze page with a different headline.

Hot retargeting (opted in but didn't book): send a WhatsApp message + email with the "only 3 audit slots left this week" urgency sequence.

📐 The Value Ladder — How You Ascend Clients

Start them at ₹8K–15K/month (social media management or a single-channel campaign). Deliver results in 60 days. Then present the Growth package at ₹20K–40K/month (multi-channel + performance marketing). At the 6-month mark, present the Scale retainer at ₹50K–1L+/month (full funnel, ads, SEO, web, brand). Every upsell conversation is anchored by a results report showing ROI.
