**SECTION 2 — PAIN POINTS**

The Brutal Reality

Your Website Is Costing You Customers Every Day

You worked hard to build your business. But if your website isn't converting visitors into clients, you're leaving money on the table — every single day.

🐢 Painfully Slow 53% of visitors abandon a site that takes more than 3 seconds to load. Are you bleeding potential clients?

📱 Not Mobile-Friendly Over 70% of your visitors are on mobile. If your site looks broken on a phone, they leave — and never return.

🔍 Invisible on Google No SEO means no traffic. Your competitors are stealing customers you don't even know you're losing.

😐 Looks Outdated First impressions happen in 0.05 seconds. An old design screams "don't trust us" before you say a word.

💸 Zero Leads Coming In A beautiful website that doesn't convert is just an expensive brochure. You need a machine, not art.

👻 No Online Presence If you don't exist online, you don't exist. Customers can't find what they can't see.

**SECTION 3 — CORE VALUES**

Why Clients Trust Us

5 Principles That Make Us Different

Anyone can build a website. We build your unfair advantage. Here's how we earn your trust before you spend a rupee.

01 — Radical Specificity "They're talking directly to ME." We don't do generic. Every word, layout, and design choice is made for your specific audience — so your visitors instantly feel understood, not sold to.

02 — Speed of Results "How soon will my life change?" You've been stuck long enough. That's why we guarantee delivery in 21 days — with real milestones, real communication, and zero excuses. No 6-month waits here.

03 — Risk Removal "What if it doesn't work for me?" No long contracts. No confusing jargon. No disappearing after launch. We keep working until you get the results you came for — or we refund. Period.

04 — Proof Over Promise "Show me. Don't just tell me." 150+ businesses. Real results. Real screenshots. Real case studies — not stock photos or made-up testimonials. We let our work speak louder than our pitch.

05 — Human Connection "Do I actually like these people?" We're not a faceless agency with a ticket system. You get a dedicated team member who knows your business, answers calls, and treats your growth like it's personal. Because it is.

**SECTION 8 — FAQ**

Common Questions

Everything You're Wondering

How long does it take to build my website? Most websites are delivered within 21 days. A single landing page can be live in 7 days. Custom applications may take 30–45 days depending on complexity. We give you a confirmed timeline before we begin — and we stick to it.

Is the website audit really free? 100% free. No hidden fees, no credit card required, no sales call forced on you. You'll receive a personalised PDF report within 48 hours — whether or not you decide to work with us. We believe in earning your trust before your business.

What if I'm not happy with the final result? We offer unlimited revisions during the project. If after delivery you're still not satisfied, we'll continue working until you are — or we'll refund you. We've never had to offer a refund, because we involve you at every step of the process.

I have no idea what I need. Where do I start? Start with the free audit. We'll analyse your current situation and tell you exactly what we'd recommend. No jargon, no pressure — just a clear, honest plan tailored to your business goals and budget.

Do you work with businesses outside your city? Absolutely. We've worked with businesses across India — from Bengaluru to Delhi to Mumbai. Our entire process is remote-friendly. We use video calls, shared documents, and project dashboards so you're always in the loop, wherever you are.

Will my website rank on Google? Every website we build includes on-page SEO fundamentals — optimised page titles, meta descriptions, image compression, schema markup, and site speed — giving you a strong foundation to rank. For ongoing SEO growth, our monthly care plan includes continuous optimisation.
