- Reflects continued local search visibility

Areas for Improvement | Summary

Areas for Improvement

Reach and visibility remained strong, but engagement levels can be improved further.

More patient success stories, doctor-led videos, educational reels, and interactive content needed.

Converting high reach into more inquiries, reviews, and appointments should be a key focus.

Supported local discovery

May delivered positive and stable digital performance across all platforms.

Next-Phase Focus | Client-Side Support Needed

Strategic Improvements

- Increase healthcare educational video content
- Create more reels and short-form videos
- Showcase patient testimonials and success stories
- Encourage Google reviews and profile engagement
- Improve conversion-focused content to generate more inquiries and appointments

Client-Side Support Needed

- More doctor participation in video content
- Patient testimonials and success stories for social media
- Timely updates on services, achievements, and events
- Faster content approval process
- Support in collecting patient reviews on Google
