Metro United Health Care Negative Comments

1. The treatment provided was good; however, I was disappointed by the behavior of some of the nursing staff. While I was under anesthesia and gradually regaining consciousness, I became aware that certain comments were being made about my condition that felt disrespectful and inappropriate. I believe all patients deserve to be treated with dignity and respect at all times, including when they are under the effects of anesthesia. I kindly request that this matter be addressed and that staff members are reminded to maintain professional and respectful behavior toward patients.

2. Nurse ge tumba kobbu heloru keloru illa treatment ok but nurse behaviour sari illa kelavobru
   Metro owner replay madirodu only 5 start rating matra avrige bekirodu aste
   Problems bagge enu ans illa 1 canel akoke 1 hour tagondru ivrella staff nurse metro owner niv replay madle beku madilla andre nim hospital ge ketta name.

3. My experience with Metro Hospital, Shivamogga was extremely disappointing. The overall hospital management is very poor, and the coordination between staff and patient attendants is not handled professionally. Many attendants behave as though they are doctors, which creates confusion and frustration for patients and their families.

   The cleanliness and maintenance of the hospital are also below expectations. Toilets were not maintained properly, and even the floors and common areas did not appear hygienic. For a healthcare facility, cleanliness should be a top priority, but unfortunately that was not the case here.

   If you are someone looking for proper care and support for your sick family members, I would strongly suggest reconsidering before choosing this hospital. Along with financial loss, the stress and mental pressure caused by the poor management make the experience even worse.

   In my opinion, government hospitals provide much better service and patient care compared to the experience I had here.

4. I had a very unsatisfactory experience. There is no professionalism in this hospital.

5. Dr pruthivi Sir is good but the facality is very bad..doctor attendres and lab workers are very bad.. If u give samples u will get reports at afternoon and if have a oppitiment also u have to wait till evening.. No sufficent chairs to sit for patients u have hear the sound side banni.... Side banni whr we to go to side... Who have lots of time and pastions u go to there other wise dont go...

6. Staffs are not well trained
   Short sister name geetha she just not answering the question shouting on other sisters and not working
   Totally staffs unfit to run the hospital.

7. Hello team metro
   I have taken my physiotherapy in your hospital on Saturday..
   Here am writing my own worst experience with your faculty , they are not at all professional and they don’t how to treat a patient..
   I think they are working only for salary not for their ethics
   So please look into it and change them asap to keep your hospital reputation
   Thank you

   We will never recommend your hospital for anyone.

8. If you have a big health problem, never go to Metro Hospital. I lost my brother because of their careless treatment and irresponsiblity. They are not capable of handling serious cases and show no compassion to patients or families. And lastly, they did not even hand over my brother's body until we deposited money.
   Please don't risk your loved ones' lives here.

9. Very rude doctors. Dr Rohit is very arrogant and has an attitude of him being a doctor. When we had to make the decision of admitting the patient or not, he started shouting and arguing with us.

10. Unprofessional behaviour of staff not giving correct information about metro hospitalities.

11. This is not a good hospital nurses are not well traind
    They prick too many times and some one useingbtheir mobile in the ward but not concentrate with patients plz take care of patient.

12. Everything is chaotic
    Where order is a disorder.
    Thoroughly unprofessional environment.

13. Worst service ever ...tooo laaate and tooo bad.

14. Doctor's are really good and well experienced. I would request management should give attention to some staff and security people regarding how to speak with patients and patients care taker. They are soo rude many times.

    Also please arrange few more space to sit for
    opd patients.

    Thank you.

15. Here am giving attention to management how your employees treats to patient party.
    We had recommendation and visited this hospital for my wife dengue treatment and meat PRO Mr,bhuvan initial conversation was nice,when it comes to admission we asked to show us the all kind of room so that we can make choice as per our comfortable,initially he is refused somewhere we conveced him and then he showed room from outside and even for special room also he said we will make you free but you can just see from outside as we believe special room was good we said ok,then once we shifted we saw lazyness of the people
    1.The room is having one bed for patience party which is less then 5feet.and no pillow and bedsheet was arranged.

2.TV cable are lying no tv available
3.the room is not having space for comfortably standing 3 people,
4.no hand wash available
5.lots of mosquito atleast no coil available in room

Then my wife has not able to slept in night for having continuous itching and rashes as we informed nobody takes care,and after saying many times nurse has given some injection,I mean here doctor has to visit first and need to check the patient analyse and then only doctor can recommend but over a call some injection suggested and nurse has given to patient.when we asked for doctor then were saying they are in emergency.
When we discussed this things next day morning with PRO Mr.shaikh he was like the room has given for time being and will be shifted to you l,and he himself suggested us to complain to them in frequent bases so that they can make necessary arrangements,it seems like they are incompetence and patient party has to tell them for everything.we are expecting basic things from them.
We are deeply disappointed the way PRO Mr bhuvan gesture,please guys we expect atleast some common gesture from you.

16. All OPD patients may have given 4-5 stars here.
    But I will tell you the real truth in-Patient (IP)
    1) Underqualified Nursing staff and Junior Doctors.
    2) Senior doctors who treated my father wouldn't know what had actually happened.
    3) They told the treatment is possible only in Bangalore.(MD doctors said this)
    4)My dad had to travel in an OMNI van for MRI scan.No MRI was available.
    5) One extra star for referring to a Good doctor within 2 days of treatment.(after coming to know that they cannot treat it)
    6) Charges for Ambulance from Shimoga to Bangalore was fixed to 12k and I think it is too much and hospital shared the money.
17. Worst service of the staff
    The low budget lodges is better than this hospital
    They don’t know how to behave with the patients
    Hygiene of the hospital is 5% out of 100 they don’t even wash the bed covers for every patient discharge they reuse for other wards.
18. World biggest worst hospital plz dont go there.If u like to die that hospital is very good to be alive its very worst😔😔😔😔😔🙅‍♂️🙅‍♂️😭
19. It' was worst experience, PRO and nurses and door security were behaving like gods , they don't have humanity, they treat us like dogs, it's not recommendabel hospital at shivmogga.
20. Doctor were good but staff behaviour was bad. Like cashier at Diagnostics and door staff were behaving like gods.

    Its really disappointing.
21. Worst service....The insurance department (Shabarish) has zero knowledge about insurance and doesn't help out on any related query. He doesn't claim all the bills. Just tries to escape from the queries.
    Doctor is good and hospital is fine. Management also doesn't help much, they try to cover-up their mistakes.
    Shabarish is the most nasty irresponsible person from insurance dept.
22. The worst token system, receptionists does the worst job here, they give higher token to the people who come early, lesser token number to the people who come later.
    People who come early had to wait unnecessarily.
    There is no enough space and ventilation in the waiting room. If you have a recommendation you go

directly without even waiting for a minute.
We unnecessarily ended up waiting for more than 3hrs for no reasons.

Even though doctors and facilities are good, i don't recommend anyone to visit such kind of hospitals.

23. Behaviour of the security staffs is Worst No respect for those who accompany the patients.
Lift does not work, looks like fish market. To proper facilities for the patients caretakers
The doctors kind of ok my be you can consider this hospital just of emergency first aid
24. Worst hospital for delivery
Nursing dept is not good for child care no doctor visit
25. Doctors are good.. But the high handed behaviour of the security staffs is baffling. No respect for those who accompany the patients.. Govt hospitals are better for that matter. Lift wont work, dirt lying all around on top of that.
26. IT IS JUST A GLORIFIED MORTUARY Please never ever go to this hospital , my dad had a small blood clot in the head and according to doctor Madhusudan it was minor and dad was supposed to be discharged within 4 - 5 days but my dad never made it out alive after staying in ICU for 15 days all the doctor said was we don't know why your dad is not recovering and informed us to take to some other hospital where they said it was too late ...metro is the worst hospital and worst treatment is provided Please don't go to this hospital if you want to see your loved ones alive I MADE A MISTAKE my dad walked in to this hospital alive and came back dead .

God will never ever forgive those doctors a lady who was least bothered about patient condition would come in the morning and hand over the bill we ended paying almost 3 times the initial estimation for the procedure and still more for medicine but still they were unable to save my dad I wish this hospital followed some ethical and morale standards and took responsibility of the patient's

I have consulted few neuro surgeon I Bangalore they informed me it was a very simple and minor surgery all that was needed was a small burrow instead for money doctor Madhusudan have removed a piece of a skull even the doctors to whom I showed the documents were confused ,
Dr Madhusudan has two junior doctors in his team who are less trained on surgery but very well trained on misleading patients one of the lady junior doctor who mislead us in the beginning informing us only a small hole should be drilled in the skull had no idea why doctor Madhusudan has taken a piece of the skull out when my dad case was not that serious
I pray to God that those who played with my dad's life for money and neglected one life , karma will show them one day results of their deeds
Dr Madhusudan and his team are not at all a doctor he is a cold blooded murder I am gathering evidence to file a case against him and this hospital ...

WORST HOSPITAL.

27. Hi All,

Please find my personal experience on this hospital (For kannada friends: will post in kannada also shortly)

About Hospital:

Multiple speciality doctors are available, but none of them have the experience and reputed name in the locality. Since doctors does not have reputed names, it is hard to get the patients to the hospital. So, the hospital is dependent on referral of other reputed doctor in Shimoga where there will refer here might be for commission.
Example: You will visit let say ABC doctor of XYZ clinic in Shimoga. ABC doctor is specialist in diabatic

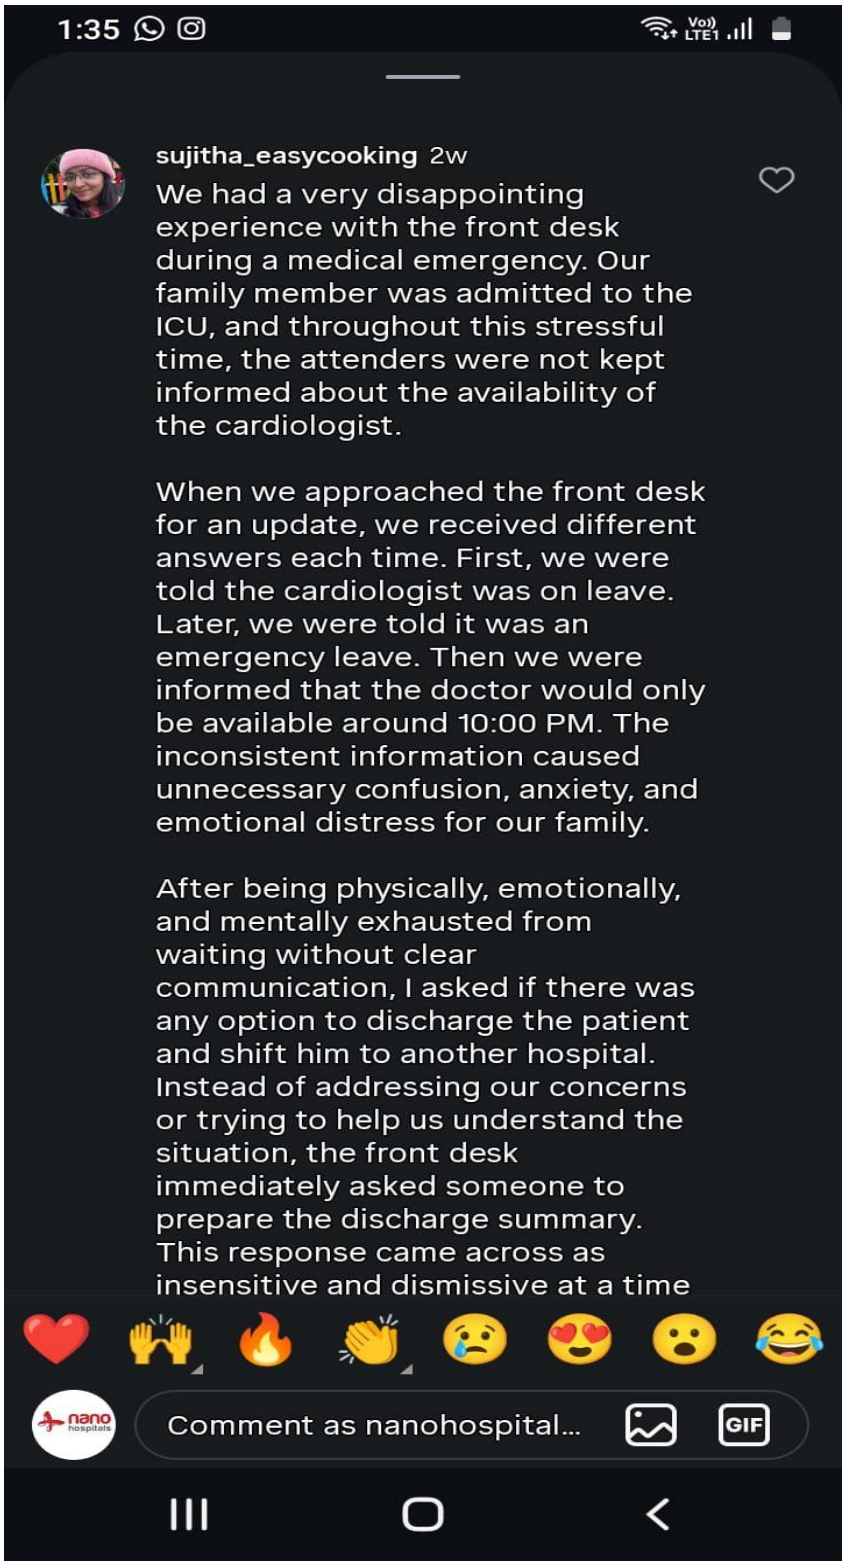

care, on ECG here he suspects you might have Heart issue where he can't give the treatment. So this ABC doctor will refer this hospital, where he might get good commission on the bill since heart issues will have very high operation costs.
This hospital does not have the good operation theatre where complex operation can't be performed. Do not visit for any complex operations like heart procedures and all.

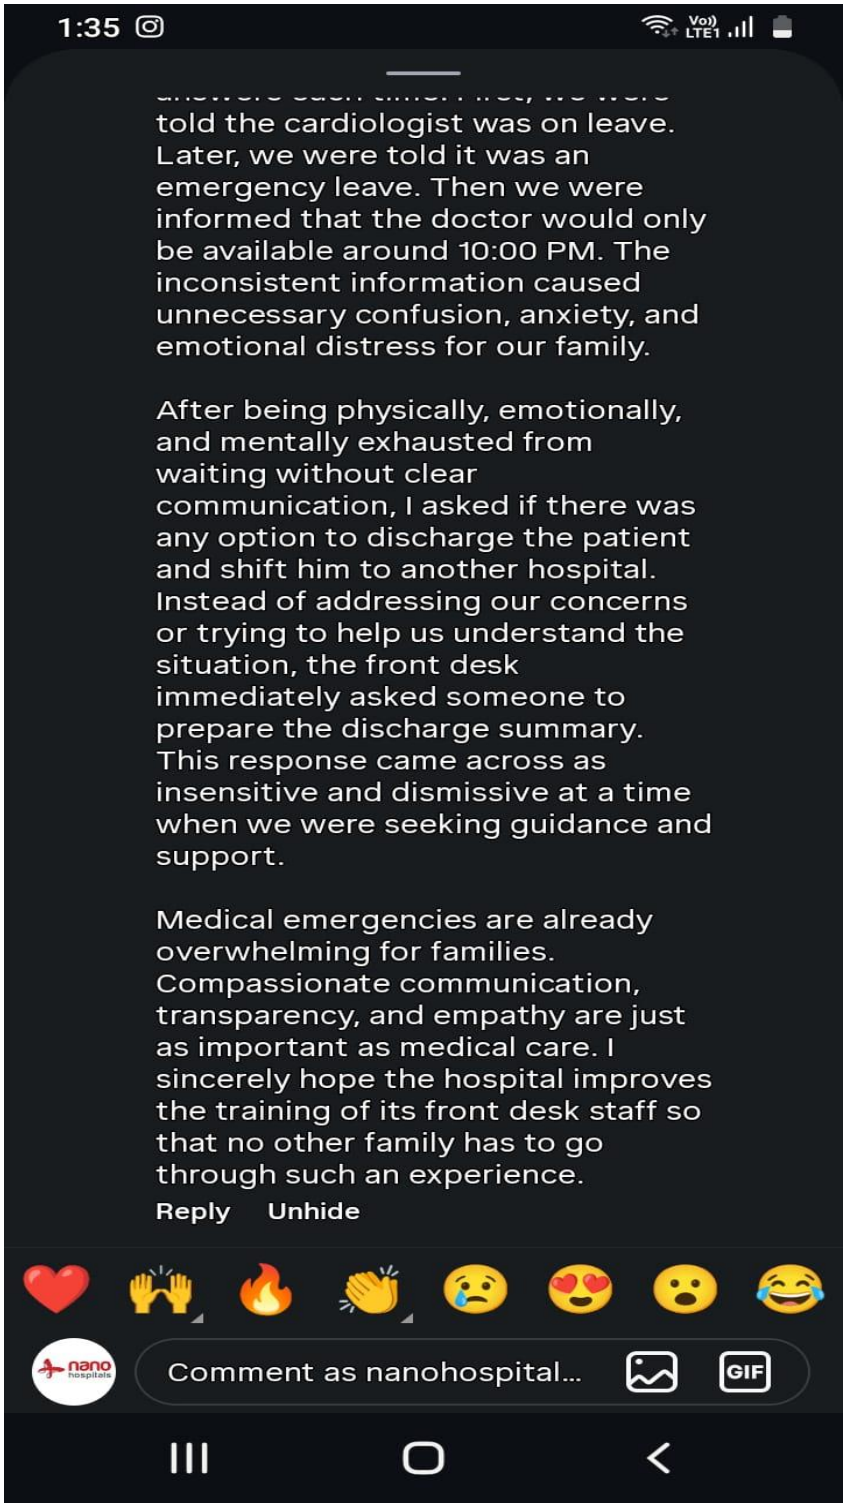

About doctor's:
In my case my uncle faced ECG issue, where he was referred to this hospital for angioplasty surgery, where the doctor was under experienced in performing so which costed his life.

My suggestion:
Since many doctors are inexperienced, better take second opinion for any complex procedures

28. One of the worst hospital
    No proper response from the staff
    They act like government hospitals ward boys are asking money for each and ever think
    No proper response and treatment
    Worst experience ever.
29. Worst hospital they killed my father Dr madhusudhan and his team are gang of killers plz do not go this hospital under qualified staff like nurses & doctors degraded medical treatment and over hyped hospital charges patients exuberantly for normal treatment and never let patient to come out alive of the hospital
    Please never go to this hospital
    Dr madhusudhan and his Junior doctors should be banned from practicing medicine
30. Worst hospital and worst experience ever please do not go this hospital here every one is only concerned about money and least worried about wellbeing of the patient

Instagram Review

1:35
told the cardiologist was on leave. Later, we were told it was an emergency leave. Then we were informed that the doctor would only be available around 10:00 PM. The inconsistent information caused unnecessary confusion, anxiety, and emotional distress for our family.
After being physically, emotionally, and mentally exhausted from waiting without clear communication, I asked if there was any option to discharge the patient and shift him to another hospital. Instead of addressing our concerns or trying to help us understand the situation, the front desk immediately asked someone to prepare the discharge summary. This response came across as insensitive and dismissive at a time when we were seeking guidance and support.
Medical emergencies are already overwhelming for families. Compassionate communication, transparency, and empathy are just as important as medical care. I sincerely hope the hospital improves the training of its front desk staff so that no other family has to go through such an experience.
