Health In Pocket – Video 1

Topic: Why Patients Never Return

Duration: 35–45 Seconds
Platform: Instagram Reels

SCENE 1 – Hook (0–4 sec)

Visual: A patient walks out of a hospital entrance. The automatic doors close behind them.

Voice Over:

"Every patient leaving your hospital today is making one decision... Will they come back... or never return?"

SCENE 2 – Reality (4–8 sec)

Visual: Busy OPD, doctors consulting patients, smiling nurses, modern hospital environment.

Voice Over:

"Your doctors provide exceptional care. Your staff delivers a great experience. Patients leave your hospital with trust."

SCENE 3 – The Silent Gap (8–12 sec)

Visual: Patient reaches home. Phone remains silent. Calendar pages flip.

Voice Over:

"But the moment they walk out, communication often stops. And that's where patient relationships begin to fade."

SCENE 4 – The Missed Opportunities (12–18 sec)

Visual: Missed appointment notification, unopened medicine box, patient searching online for another hospital.

Voice Over:

"No follow-up. No appointment reminders. No medication support. No continued engagement."

SCENE 5 – Business Impact (18–25 sec)

Visual: Patient visits another hospital. Pharmacy purchase elsewhere. Diagnostic test at another center.

Voice Over:

"The next consultation... the next diagnostic test... the next pharmacy purchase... often happens somewhere else."

SCENE 6 – Bigger Than Revenue (25–31 sec)

Visual: Hospital dashboard showing declining patient return rate, followed by concerned management.

Voice Over:

"That's more than a missed visit. It's lost patient loyalty, weaker continuity of care, fewer referrals, and slower hospital growth."

SCENE 7 – The Shift (31–36 sec)

Visual: Hospital sends reminders, wellness messages, follow-up notifications. Patient smiles while using the hospital's branded app.

Voice Over:

"Leading hospitals don't wait for patients to return. They stay connected, build trust, and strengthen relationships beyond every visit."

SCENE 8 – Brand Reveal (36–42 sec)

Visual: Beautiful reveal of the Health In Pocket platform, branded hospital mobile app, smart card, patient engagement dashboard.

Voice Over:

"Introducing **Health In Pocket** — India's First White-Labelled Patient Relationship & Retention Operating System, helping hospitals stay connected with every patient through continuous digital engagement."

SCENE 9 – Closing Message (42–46 sec)

Visual: Happy family returning to the same hospital. Doctor welcomes them.

Voice Over:

"Because patients return to hospitals that remember them."

SCENE 10 – CTA (46–50 sec)

Visual: Clean white background with Health In Pocket branding and website placeholder.

Voice Over:

"Retain more patients. Build lasting relationships. Drive sustainable growth. Book your personalized demo today."

On Screen CTA:
Retain. Care. Grow.

Health In Pocket – YouTube Video 1

Why Patients Never Return to Your Hospital (And How Leading Hospitals Are Fixing It)

Duration: 75–90 Seconds

SCENE 1 – Hook (0–8 sec)

Visual
Busy hospital. Patients arriving and leaving. Slow-motion shot of a patient walking out of the hospital.

Voice Over

Every day, hospitals invest heavily in attracting new patients through doctors, infrastructure, technology, and quality care.

But here's a question every hospital leader should ask...

What happens after a patient walks out of your hospital?

SCENE 2 – The Hidden Problem (8–20 sec)

Visual
Doctor consultation, smiling patient, discharge process.

Voice Over

For many hospitals, the patient journey ends at discharge.

Not because the treatment is over...
But because communication stops.

Over time, patients miss follow-ups, forget appointments, delay medications, and gradually lose their connection with the hospital.

SCENE 3 – The Real Cost (20–38 sec)

Visual
Patient visiting another hospital, another diagnostic center, another pharmacy.

Hospital management reviewing reports.

Voice Over

When that happens, the next consultation...
the next diagnostic test...
the next pharmacy purchase...
and even referrals often go somewhere else.

This isn't just about losing revenue.

It affects patient retention, continuity of care, treatment adherence, and long-term hospital growth.

SCENE 4 – What Leading Hospitals Do Differently (38–58 sec)

Visual
Hospital-branded mobile app.
Appointment reminders.
Medicine reminders.
Health tips.
Loyalty rewards.
Patient engagement dashboard.

Voice Over

Leading hospitals understand that exceptional healthcare doesn't end when the patient leaves.

They continue the relationship through timely reminders, follow-ups, preventive care, health education, and personalized communication.

Because patients are more likely to return to hospitals that stay connected with them.

SCENE 5 – Introducing Health In Pocket (58–78 sec)

Visual

Premium UI animations of the platform.

Hospital-branded mobile app.

Patient dashboard.

Doctor dashboard.

Smart Health Card.

Analytics.

Voice Over

That's why we built **Health In Pocket**.

India's First White-Labelled Patient Relationship & Retention Operating System.

Designed to help hospitals strengthen patient relationships through continuous digital engagement.

From appointment reminders and medication support to loyalty programs, digital health records, smart cards, patient communication, and analytics—

Health In Pocket helps hospitals retain more patients while delivering better continuity of care.

SCENE 6 – Closing (78–90 sec)

Visual
Happy patient returning with family.

Doctor welcomes them.

Hospital logo animation.

Voice Over

Because healthcare isn't built on one visit.

It's built on lasting relationships.

Health In Pocket helps hospitals retain more patients, improve patient loyalty, and drive sustainable growth.

Health In Pocket – Founder Story

Why We Built Health In Pocket

Platform: LinkedIn

Duration: 45–60 Seconds

SCENE 1 – Hook (0–5 sec)

Visual
Founder walking through a hospital corridor.

Voice Over

"Think about this for a moment...

Banks remember every transaction.

E-commerce platforms remember every product you browse."

SCENE 2 – The Question (5–12 sec)

Visual
Patients leaving a hospital after consultation.

Voice Over

"But why is it that a hospital often loses touch with the very patient who trusted it with their health?"

SCENE 3 – The Reality (12–20 sec)

Visual
Doctor consulting a patient. Patient leaves. Phone stays silent.

Voice Over

"It isn't because hospitals don't care.

In fact, doctors and healthcare teams work tirelessly every single day.

The challenge is that most hospitals were never equipped with a system to continue the relationship after the patient leaves."

SCENE 4 – The Hidden Cost (20–32 sec)

Visual
Calendar pages turning.
Missed follow-up.
Another hospital visit.

Voice Over

"When follow-ups don't happen, patients don't just miss appointments.

They begin to feel forgotten.

And when patients no longer feel connected, they often seek care somewhere else."

SCENE 5 – The Insight (32–40 sec)

Visual
Founder speaking directly to the camera.

Voice Over

"Over time, we realized this isn't a healthcare problem.

It's a patient relationship problem.

And relationships are what build trust, loyalty, and long-term hospital growth."

SCENE 6 – Why We Built HIP (40–52 sec)

Visual
Health In Pocket platform, hospital-branded app, patient engagement dashboard.

Voice Over

"That's why we built **Health In Pocket**.

A White-Labelled Patient Relationship & Retention Operating System that helps hospitals stay connected with patients long after they leave the hospital."

SCENE 7 – Vision (52–60 sec)

Visual
Founder walking through the hospital, smiling patients, doctors interacting with families.

Voice Over

"Our vision is simple.

Every patient should feel remembered.

Every hospital should build relationships that last beyond a single visit.

Because the future of healthcare isn't just treating patients.

It's staying connected with them."

SCENE 8 – CTA

Visual
Health In Pocket logo with a clean white background.

Voice Over

"Follow Health In Pocket as we build the future of patient relationships in healthcare."

On-Screen Text

Retain. Care. Grow.

Optimized LinkedIn Caption

People often ask us why we built **Health In Pocket**.

The answer is simple.

We noticed something that exists across the healthcare industry.

Hospitals invest heavily in clinical excellence, infrastructure, technology, and patient care. Yet once a patient leaves, the relationship often pauses until the next visit—if there is one.

It's not because hospitals don't care.

It's because most healthcare organizations were never designed with a system to maintain meaningful patient relationships beyond the hospital walls.

We believe this is one of the biggest opportunities in healthcare today.

When hospitals stay connected through timely follow-ups, reminders, health education, and ongoing engagement, they don't just improve patient retention—they strengthen continuity of care, build trust, and create better health outcomes.

That's why we built **Health In Pocket**.

Not just as software, but as a patient relationship platform designed to help hospitals build lasting connections with every patient they serve.

Because healthcare doesn't end at discharge.

The relationship should continue.

Production Notes

To make this feel genuinely founder-led rather than promotional:

Film in a real hospital environment with natural movement instead of a static office.
Use minimal background music (soft piano or cinematic ambient), letting the founder's voice carry the story.
Speak directly to the camera for the insight and vision sections to create authenticity.
Keep on-screen text minimal—highlight only key phrases such as "Patient Relationship Problem", "Stay Connected", and "Retain. Care. Grow."
End with a subtle Health In Pocket logo animation rather than a hard sales pitch.

This approach positions the founder as someone solving an important industry challenge, which is exactly the kind of content that performs well on LinkedIn.

Health In Pocket – Feature Series

Video 3: HIP Dashboard

Platform: Instagram Reels
Duration: 35–45 Seconds

SCENE 1 – Hook (0–4 sec)

Visual
Hospital receptionist searching through multiple systems and papers. Doctor waiting.

Voice Over

"What if every patient walked into your hospital already known—not introduced?"

SCENE 2 – The Problem (4–9 sec)

Visual
Staff switching between multiple software screens. Patient repeating medical history.

Voice Over

"Too many hospitals spend valuable time searching for patient information instead of serving patients."

SCENE 3 – Dashboard Reveal (9–16 sec)

Visual
The HIP Dashboard opens with a clean, modern interface showing the patient profile.

Voice Over

"Meet the **HIP Dashboard**—your hospital's complete patient relationship hub."

SCENE 4 – Patient at a Glance (16–24 sec)

Visual
Zoom through patient profile:

* Medical history
* Previous consultations
* Appointments
* Reports
* Prescriptions

Voice Over

"Everything your team needs is available in one place—patient history, consultations, prescriptions, reports, and upcoming appointments."

SCENE 5 – Smart Follow-ups (24–31 sec)

Visual
Follow-up reminders, medication alerts, pending diagnostics, engagement timeline.

Voice Over

"Track follow-ups, medication reminders, pending diagnostics, and patient engagement—all from a single dashboard."

SCENE 6 – Better Decisions (31–38 sec)

Visual
Doctor confidently reviewing the dashboard before greeting the patient. Patient smiles.

Voice Over

"When every interaction is informed, every patient feels remembered, every consultation becomes more personal, and every relationship grows stronger."

SCENE 7 – Brand Positioning (38–43 sec)

Visual
Hospital-branded app, analytics dashboard, smart health card, communication module.

Voice Over

"The HIP Dashboard is part of **Health In Pocket**—India's First White-Labelled Patient Relationship & Retention Operating System."

SCENE 8 – CTA (43–48 sec)

Visual
Dashboard animation transitions to the Health In Pocket logo.

Voice Over

"One dashboard. One complete patient journey. Book your personalized demo today."
