SOCIAL MEDIA STRATEGY (2026)

🎯 Goal

Objective

Build a trusted healthcare brand that educates, engages, and converts viewers into patients.

Focus Areas

- Increase Brand Awareness
- Build Patient Trust
- Increase OPD/Appointments
- Generate WhatsApp Leads
- Improve Google Reviews
- Build a Strong Community
- Increase Patient Retention

Target Audience

Understanding who we're talking to helps us create the right content, pick the right platform, and build more trust and enquiries.

Families (parents, children, senior citizens, caregivers) need content around family healthcare, maternity, pediatrics, and preventive care.

Women aged 20 to 45 are interested in pregnancy, PCOS, gynecology, breastfeeding, and women's wellness. Good content here includes doctor tips, FAQs, and awareness campaigns.

Men aged 25 to 60 care about heart health, diabetes, orthopaedics, urology, and preventive check-ups. Educational reels, patient stories, and health tips work well for them.

Senior citizens above 50 are focused on heart care, joint pain, cataract, arthritis, BP, and diabetes. Recovery stories and doctor advice connect well with this group.

Working professionals deal with stress, back pain, lifestyle diseases, and need annual check-ups. Quick health tips and preventive care content suit them.

Students and young adults aged 18 to 25 care about mental health, nutrition, sports injuries, eye care, and vaccinations. Reels, myth-vs-fact content, and FAQs work best here.

Beyond this main audience, there's also a secondary audience — existing patients, their families, schools, corporate employees, the local community, fitness enthusiasts, and other healthcare professionals.

social media KPIs

Awareness
Follower growth, reach, impressions, video views

Engagement
Likes, comments, shares, saves, engagement rate, story replies

Community
DMs received, response rate to comments/DMs, participation in polls/quizzes/challenges

Lead Generation
WhatsApp clicks/chats, appointment enquiries from social, click-through rate on bio link or "Book Appointment" button

Reputation
New Google reviews, average rating, review response rate

Retention
Returning followers/engagers, repeat interactions from same patients, referral mentions

Platform Selection

Instagram is the main platform for reels, doctor tips, and patient stories, and works well with families, women, and young adults.

Facebook works better for senior citizens and families who prefer detailed posts, health camp updates, and community groups.

YouTube is good for long-form content like doctor interviews, detailed explainers, and patient journeys — this builds deeper trust.

WhatsApp is the main channel for lead generation and appointment booking — this is where interest turns into action.

Google Business Profile is important for reviews and being found by people searching nearby hospitals.

LinkedIn helps with corporate wellness tie-ups and building credibility with other healthcare professionals.

Twitter/X is optional, mainly useful for awareness days and quick updates.

Community Building Strategy

The goal is to build a trusted healthcare community by educating and supporting patients so trust, loyalty, and retention grow over time.

Key activities include replying to every comment within 24 hours, answering DMs personally for appointment or health queries, using interactive stories like polls and quizzes, asking health questions to start conversations, sharing patient testimonials with consent, hosting monthly doctor live sessions, running health challenges like a 7-day walking challenge, celebrating milestones like baby welcome posts and recovery stories, appreciating patients and staff on days like Doctors Day or Nurses Day, and collaborating with schools, corporates, and NGOs for camps and wellness programs.

Content ideas for community building include health polls and quizzes, doctor Q&A sessions, AMAs, patient testimonials, recovery stories, behind-the-scenes content, team introductions, milestone celebrations, awareness campaigns, baby welcome posts, family health portraits, a "Happiness OPD" series, department spotlights, an FAQ series like "Patients Ask, Doctors Answer," festival wishes, and highlights from school or corporate health camps.

For the engagement routine — daily, the team should reply to all comments, respond to DMs, answer enquiries, acknowledge mentions, and reply to Google reviews. Weekly, there should be one story poll or quiz, one testimonial shared, one behind-the-scenes reel, one doctor or department feature, and one FAQ answered. Monthly, there should be one doctor live session, one community campaign, one milestone celebration, one patient success story, and one school or corporate health activity.

Success is measured through engagement rate, comments, shares, saves, story replies, DMs, appointment enquiries, WhatsApp clicks, Google reviews, testimonials, returning followers, and community participation.

Engagement Strategy

The goal here is to keep the audience actively involved so they feel heard and valued — which leads to more trust, more enquiries, and more returning patients.

The core approach is to be responsive by replying quickly, to sound human and warm rather than robotic (since people are often anxious about health), to encourage two-way conversation by asking questions instead of only posting information, to use interactive formats like polls and Q&A stickers to get people tapping and responding, to acknowledge every single interaction whether it's a comment, DM, or review, to turn happy patients into advocates by encouraging them to share their experience or leave a review, and to reward participation by featuring engaged patients, like a "Patient of the Month."

Daily, the team should reply to comments and DMs, respond to Google reviews, acknowledge mentions, and follow up on WhatsApp enquiries. Weekly, there should be one interactive poll or quiz, one testimonial shared, and one educational reel or FAQ posted. Monthly, there should be one live doctor Q&A, one awareness campaign or challenge, and one milestone or achievement highlighted.

1. Milestone & Celebration Content

Goal: Build trust and celebrate hospital achievements.

Target Audience: Parents, families, patients, local community.

Platform: Instagram, Facebook, YouTube Shorts, Google Business Profile.

Content Pillars: Patient Stories, Hospital Achievements, Community Trust.

Content Creation: Baby welcome posts, delivery milestones, discharge celebrations, recovery anniversaries.

Publishing Schedule: Weekly milestone posts + Monthly celebration reels.

Audience Engagement: Encourage congratulations, comments, and shares.

Lead Generation: Promote maternity services and consultations.

Performance Analysis: Reach, shares, comments, profile visits, enquiries.

Second Birthday Club

Goal: Celebrate patient recovery.

Target Audience: Recovered patients and families.

Platform: Instagram, Facebook.

Content Pillars: Patient Stories, Trust.

Content Creation: Recovery celebrations and reunion videos.

Publishing Schedule: Monthly.

Audience Engagement: Family messages and comments.

Lead Generation: Patient referrals.

Performance Analysis: Engagement and shares.

Department-Wise Weekly Campaign

Goal: Promote all hospital departments.

Target Audience: Patients seeking specialty care.

Platform: Instagram, Facebook, LinkedIn.

Content Pillars: Doctor Branding, Education.

Content Creation: Weekly department photos, doctor videos, FAQs.

Publishing Schedule: One department every week.

Audience Engagement: Department Q&A.

Lead Generation: Department appointments.

Performance Analysis: Department-wise enquiries.

Patient POV (Eye View)

Goal: Reduce patient fear and increase transparency.

Target Audience: New patients.

Platform: Instagram Reels, YouTube Shorts.

Content Pillars: Patient Journey.

Content Creation: Registration to discharge journey.

Publishing Schedule: Weekly.

Audience Engagement: Ask viewers about their experience.

Lead Generation: Appointment bookings.

Performance Analysis: Watch time and saves.

FAQ Series

Goal: Educate patients.

Target Audience: General public.

Platform: Instagram, Facebook, YouTube.

Content Pillars: Education.

Content Creation: Doctor answers common health questions.

Publishing Schedule: 2–3 times per week.

Audience Engagement: Collect questions from followers.

Lead Generation: Doctor consultation enquiries.

Performance Analysis: Saves, shares, watch time.

Ask the Department – Swap Series

Goal

Increase department visibility and showcase teamwork across the hospital.

Target Audience

Patients, families, local community.

Platform Selection

Instagram Reels, Facebook, YouTube Shorts.

Content Pillars

Department Awareness | Staff Culture | Doctor Branding

Publishing Schedule

1 Reel every week.

Audience Engagement

Ask viewers:
"Which department should we feature next?"

Nano Hospitals + TruScan Collaboration Ideas

Since both brands are healthcare-related, they can collaborate together:

Before Treatment Checklist

- Doctor Consultation (Nano)
- Blood Tests (TruScan)
- Scan (TruScan)
- Treatment (Nano)

FAQ Series – Top Google Patient Questions

Goal: Answer real patient questions to build trust and increase appointment enquiries.

Why it matters: Patients search Google before choosing a hospital. If your social media answers those questions, your hospital becomes the trusted source.

General Hospital Questions

1. Which hospital is best for my health problem?
2. When should I visit a hospital instead of a clinic?
3. What tests should I do before meeting a doctor?
4. How do I book an appointment?
5. What should I carry for my hospital visit?
