Website SEO Audit Report

Website: https://kaadehospital.com/

I completed the initial SEO audit for **Kaade Hospital (kaadehospital.com)**. The website currently has an **SEO score of 18/100**, with **16 critical issues and 4 minor issues**.

Website: kaadehospital.com
SEO Score: 18/100
Critical Issues: 16
Minor Issues: 4

Key Issues Identified

- Website loading speed is slow, affecting user experience and SEO.
- Website is not fully mobile-friendly.
- XML Sitemap is missing.
- Robots.txt file is missing.
- Language tag is not defined.
- Canonical tags need to be fixed to avoid duplicate content issues.
- Several images are missing ALT text.
- Multiple H1 tags are used instead of a single H1.
- Meta descriptions are missing on pages.
- Heading structure (H2–H6) is not properly organized.
- Structured Data (Schema Markup) is missing.
- Hreflang tags are not implemented (if multilingual support is required).
- Social media links (YouTube, Facebook, Instagram, LinkedIn, X) are missing.
- Backlink profile is weak and needs improvement.

Recommendations

- Improve website speed and Core Web Vitals.
- Make the website fully responsive for mobile devices.
- Add XML Sitemap and Robots.txt.
- Optimize on-page SEO (Meta Tags, H1, ALT Text, Headings).
- Implement Hospital, Doctor, FAQ, and Local Business Schema.
- Add social media links.
- Build quality backlinks to improve domain authority.

Expected Outcome

Fixing these issues will help improve:

- Google Search Rankings
- Organic Website Traffic
- User Experience
- Local SEO Visibility
- Website Performance
- Patient Enquiries and Conversions

These issues are impacting the website's SEO performance, search visibility, and user experience. I recommend prioritizing the technical SEO fixes first, followed by on-page optimization and content improvements. Once these are resolved, we can focus on local SEO and backlink building to improve rankings and organic traffic.
