Local Citation Strategy Proposal – Truscan And Nano

1. Requirement

Expand Truscan Diagnostics' and Nano presence on trusted healthcare and local business directories by creating or optimizing business profiles on:

Healthcare Directories

- Practo
- Lybrate
- ClinicSpots
- Medindia

Local Business Platforms

- Justdial
- Bing Places
- Apple Business Connect
- Sulekha

Google Business Profile is already being managed and optimized regularly, so the focus is on expanding to additional trusted platforms.

---

2. Why is this Required?

Google uses trusted business directories to verify the legitimacy and credibility of a business.

Having consistent business information across multiple healthcare platforms helps Google understand that Truscan Diagnostics and Nano Hospital is a trusted diagnostic center and Hospital.

This strengthens Local SEO signals and improves online visibility.

---

3. Implementation Plan

For each platform:

- Create or claim the business profile.
- Verify ownership.
- Add consistent business information (Name, Address, Phone Number).
- Add website URL.
- Upload hospital logo and images.
- Add diagnostic services and Hospital services.
- Add doctor information (if supported).
- Update business hours.
- Maintain the profile regularly.

---

4. Expected Outcome

- Improved Local SEO signals.
- Better Google Maps visibility.
- Increased trust and credibility.
- Higher visibility for location-based searches.

- More referral traffic from healthcare platforms.
- Increased patient inquiries and appointment bookings.

---

5. SEO Benefits

- Stronger local business authority.
- Better business verification across trusted platforms.
- Increased brand visibility.
- Improved search engine trust.
- Supports overall SEO performance when combined with content, backlinks, and technical SEO.

Recommendation

This strategy should be implemented as part of the overall Local SEO plan. While local citations alone do not guarantee rankings, they are an important local ranking factor and help strengthen Google's confidence in the business. Combined with Google Business Profile optimization, quality content, technical SEO, and backlinks, this strategy can contribute to improved organic visibility and local search performance.

Note: Some profiles may already exist and require optimization, while others may not exist and will need to be created. If an existing profile requires optimization, we will need the login credentials or admin access. If no profile exists, we will create a new one and optimize it with the correct business information.
