TruScan Diagnostics — Instagram

DIGITAL TEAM —

Profile

- **Username** → Check if a shorter official handle is available.
- **Display Name** → Add **JP Nagar / Bengaluru** for local search.
- **Bio** → Update with services + locations + 24×7 + booking CTA.
- **Link in Bio** → Make **Book a Test** the main CTA and organise all important links.
- **Highlights** → Restructure based on patient needs and coordinate with Designer for covers.

Creative Copy Direction:

Content should be short, visual-first and idea-driven, similar to the reference creatives shared. Use one strong headline/creative thought rather than explaining the entire topic on the design. The visual should do most of the storytelling, while detailed information can be covered in the caption.

1. VIDEO EDITOR — What You Need to Tell Them

Main Responsibility

Study **how competitors create and edit Reels/videos**, identify what makes their videos engaging, and convert those learnings into original Reel directions for TruScan.

What They Need to Research

A. Competitor Reel Research

For each selected competitor:

- Check their Reels section.
- Identify **3–5 strong/high-performing Reels**.
- Select Reels based on visible views, engagement and content quality.
- Record:
    - Reel link
    - Topic
    - Views
    - Likes
    - Comments
    - Shares/Saves if visible
    - Duration
    - Format
    - CTA

B. Hook Analysis

Study the **first 2–3 seconds**.

Check:

- What appears first?
- Is there a question?
- Is there a bold statement?
- Is there a problem/pain point?
- Is a doctor shown immediately?
- Is text used on screen?
- Is the result/outcome shown first?

Example:

> “Do you really need an MRI?”

Identify why this type of hook can make people stop scrolling.

C. Editing Analysis

Check:

- Number of cuts
- Editing speed
- Camera angles
- Zooms
- Transitions
- Text animations
- Subtitles
- B-roll
- Stock footage
- Facility footage
- Doctor footage
- Before/after structure where appropriate
- Music
- Voice-over
- Sound effects

D. Video Structure

Identify common structures such as:

Hook → Problem → Explanation → Solution → CTA

or

Question → Doctor Answer → Key Information → CTA

or

Facility Shot → Process → Test Explanation → Booking CTA

E. People Used in Videos

Check whether competitors use:

- Doctors
- Radiologists
- Technicians
- Nurses
- Patients
- Reception staff
- Voice-over only
- Text-only videos

Identify which people/formats are most commonly used.

F. Duration Analysis

Compare:

- Under 15 sec
- 15–30 sec
- 30–60 sec
- 60+ sec

Identify which durations are commonly used in high-performing videos.

G. CTA Analysis

Record CTAs such as:

- Book now
- Call us
- DM us
- Save this
- Share this
- Follow for more
- Visit our centre
- Comment your question

H. Identify Gaps for TruScan

Find video formats competitors are using that TruScan isn't.

Also identify areas where competitors are weak.

Examples:

- Not enough doctor-led content
- No facility tours
- Limited test-explainer videos
- No Kannada content
- No patient journey videos
- Weak CTAs

Final Output from Video Team

Prepare:

1. 3–5 reference Reels per competitor

2. Top 10 hooks

3. Top 5 video formats

4. Top 5 editing styles

5. Top 5 CTA styles

6. 5 Reel formats TruScan should test

7. 5 original Reel ideas

Important

The objective is **not to copy competitor videos**.

The objective is:

Competitor learning → Video insight → Original TruScan execution

---

2. DESIGNER — What You Need to Tell Them

Main Responsibility

Study the **visual strategy of competitors** and identify how TruScan can improve its Reel covers, carousels, static posts and overall visual communication.

What They Need to Research

A. Reel Cover Analysis

Check competitor Reel covers for:

- Headline size
- Headline placement
- Number of words
- Doctor/people images
- Medical imagery
- Equipment imagery
- Background style
- Icons
- Brand logo

- CTA
- Contrast

Identify what makes a Reel cover immediately understandable.

B. Carousel Analysis

Study:

- Cover slide
- Headline style
- Slide structure
- Information hierarchy
- Number of slides
- Use of images
- Use of icons
- CTA slide
- Save/share prompts

Identify which carousel structures are easiest to consume.

C. Static Post Analysis

Review:

- Health awareness posts
- Package creatives
- Festival posts
- Service promotions
- Doctor posts
- Announcement posts

Check:

- Layout
- Typography
- Image-to-text ratio
- Branding
- CTA placement
- Information density

D. Competitor Branding

Identify:

- Primary colours

- Secondary colours
- Fonts
- Icon style
- Illustration style
- Photography style
- Logo placement
- Overall visual tone

E. TruScan Current Design Audit

Compare competitor design patterns with TruScan's current feed.

Identify:

- What TruScan already does well
- What looks repetitive
- Where information is overcrowded
- Which designs look too promotional
- Which content needs more visual storytelling

F. Identify Design Opportunities

Examples:

Instead of:

“Senior Citizen Package ₹5,000”

Suggest:

“5 Health Checks Seniors Shouldn't Ignore”

Then explain the tests through a carousel and introduce the package at the end.

This changes the creative from a **sales poster → useful social content**.

G. Create Visual Series

Suggest repeatable design systems for:

- Test Explained
- Myth vs Fact
- Before Your Test
- Diagnostics Made Simple
- Health Tips
- Package Explained
- JP Nagar Health Guide

Final Output from Design Team

Prepare:

- 5 Reel cover directions
- 5 carousel directions
- 3 visual series concepts
- 3 package-promotion redesign ideas
- 3 educational post formats
- Competitor visual gaps
- TruScan design recommendations

Important

Maintain **TruScan's green/white identity**.

Do not directly copy:

- Competitor layouts
- Competitor templates
- Competitor artwork
- Competitor graphics

---

3. CONTENT TEAM — What You Need to Tell Them

Main Responsibility

Study **what competitors are talking about, how they communicate it and what content opportunities TruScan can own**.

The Content Team should focus more on **topic + messaging + content strategy**, not editing or graphic design.

What They Need to Research

A. Competitor Content Topics

Identify common topics around:

- MRI
- CT
- Ultrasound
- X-Ray
- Blood tests
- Health packages
- Preventive health
- Women's health
- Senior health
- Heart health
- Diabetes
- Bone health
- Test preparation
- Diagnostic awareness

B. Identify High-Performing Topics

For selected competitor posts/Reels, record:

- Topic
- Format
- Views
- Engagement
- Hook
- CTA

Find patterns such as:

Question-based content

Myth vs Fact

Doctor explanation

“3 things you should know”

Common mistakes

Symptoms → Test explanation

C. Hook Analysis

Identify competitor hook styles.

Examples:

- “Did you know?”
- “3 things you should know before an MRI.”
- “Don't make this mistake before a blood test.”
- “MRI or CT — which one do you need?”
- “Are you making this common health mistake?”

Then create **original TruScan hooks**.

D. Content Gap Analysis

Identify what competitors are NOT explaining well.

Potential gaps:

- What happens before a test?
- What happens after a test?
- How reports are generated
- What a radiologist does
- How samples are handled
- How to prepare for tests
- Common test misconceptions
- Diagnostic technology explained simply
- Patient journey
- Kannada diagnostic education
- Local JP Nagar health information

E. Content Pillars

Build TruScan's content around:

Pillar	Purpose
Diagnostic Education	Reach + Saves
Doctor/Expert	Authority + Trust
Tests & Technology	Service Education
Patient Stories	Social Proof
Behind the Scenes	Humanise Brand
Packages	Conversion

Local + Kannada	Local Relevance

F. Create Recurring Series

1. Diagnostics Made Simple

Explain complicated diagnostic topics simply.

2. Test Explained

MRI, CT, TMT, ECG, Ultrasound, X-Ray, etc.

3. Before Your Test

Preparation-related information.

4. Ask TruScan

Doctor answers common questions.

5. Myth vs Fact

Correct common misconceptions.

6. Inside TruScan

Facility/team/process content.

7. JP Nagar Health Guide

Localised health content.

8. Package Explained

Explain who a package may be relevant for and what it includes, rather than only showing price.

G. Content Mix Recommendation

- 25% Diagnostic Education
- 15% Doctor/Expert
- 15% Tests & Technology
- 10% Patient Stories
- 10% Behind the Scenes
- 15% Packages/Offers

- 10% Local/Kannada/Special Days

Final Output from Content Team

Prepare:

- 10 content ideas
- 5 Reel topics
- 5 carousel topics
- 5 content gaps
- 10 strong hooks
- 5 recurring series
- Recommended content pillars
- Recommended content ratio
- CTA recommendations

Important

Content Team should answer:

What should TruScan talk about?

Not:

How should we edit it?

---

6. FINAL TEAM OUTPUT

All departments should finally come together as:

Digital Marketer

Competitor + Performance

↓

Content Team

Topics + Hooks + Content Gaps

↓

Video Editor

Reel Formats + Editing + Video Trends

↓

Designer

Visual Trends + Covers + Carousel Styles

↓

Team Lead

Final Strategy + Client Communication + Implementation

Final Question the Team Should Answer:

> **“Based on competitor research, what should TruScan start doing, stop doing, improve and test on Instagram?”**
