Junior Toes – Internal Content & Creative Meeting

Main Objective

Create a more authentic, child-focused and consistent Junior Toes digital presence.

The key shift is:

> **From "telling parents about Junior Toes" → to "showing parents what children experience at Junior Toes."**

---

1. Instagram Page & Overall Content Direction

What needs to change

- Improve the overall Instagram page structure and visual consistency.
- Prioritise **real children, teachers, classrooms and everyday Junior Toes experiences**.
- Reduce dependency on AI-generated visuals.
- Study competitor/reference pages for **content ideas, formats and presentation styles**.
- Maintain consistency across **Feed posts, Reels, Reel covers and Highlights**.

Team responsibility

Content Writer: Develop content around real experiences and observations.
Designer: Create a consistent visual language.
Video Editor: Prioritise real footage and natural moments over overly edited/stock-style content.

---

2. Instagram Bio & Highlights

Bio

Review the current bio and make sure it clearly communicates:

- What Junior Toes is
- What makes the learning experience different
- Location/branch relevance where required
- Clear parent-focused positioning

Highlights

Create a consistent Highlight structure:

About | Why Us | Programs | Campuses | Parents | Kids | Teachers | Events | Admissions | FAQ

Designer

Create one **standard Highlight cover style** and maintain it across all categories.

---

3. New Content Direction

The content mix should move towards:

70% – REAL

Real children, teachers, classrooms, activities, events and everyday moments.

20% – LEARN

Educational content, child development, parenting information and useful tips.

10% – EXPLORE

Illustrations, AI-assisted content and relevant trends.

Important: AI should support the content—not become the primary representation of Junior Toes.

---

4. Content Pillars

All content ideas should fall under one of these pillars:

👧 Child Development

- How children learn
- Social/emotional development
- Motor skills
- Communication
- Independence

🧠 Junior Toes Method

- Teaching approach
- Activities
- Classroom methodology
- Learning philosophy

🏫 Real Junior Toes

- Classroom moments
- Children at play
- Teachers interacting with children

- Activities
- Events
- Behind the scenes

👨‍👩‍👧 Parent Education

- Parenting tips
- Child development insights
- Common parent questions
- Learning at home

💬 Parent Proof

- Parent testimonials
- Parent experiences
- Feedback
- Real success stories

❤️ Brand Story

- Founder
- Teachers
- Junior Toes journey
- Philosophy
- Milestones

🎓 Admissions

- Programs
- Campus information
- Admissions
- Parent FAQs
- What children experience at Junior Toes

---

5. Recurring Content Series

Instead of creating completely new concepts every time, build **repeatable series**.

Video/Reel Series

- **Ask a Junior Toes Teacher**
- **1 Minute with the Founder**
- **Inside Our Classroom**
- **What We Observed Today**
- **A Teacher's Perspective**
- **Tiny Entrepreneurs**
- **Parent Corner**
- **Little Voices, Big Ideas**

Important for the team

Once a series is approved, maintain a **consistent format, title treatment and Reel cover** so parents start recognising the series.

---

6. Instagram Feed Structure

Think of the content in **3 simple lanes**:

REAL

Show the experience

- Children
- Teachers
- Classrooms
- Activities
- Events

LEARN

Give parents value

- Child development
- Parenting
- Learning tips
- Educational information

BRAND

Build Junior Toes

- Curriculum
- Philosophy
- Founder
- Teachers
- Admissions
- Milestones

This should create a better balance instead of the feed looking like only promotional or educational content.

---

7. For Content Writers

Please focus on:

- Write from the **child's experience**, not only the parent's perspective.
- Use simple, warm and natural language.
- Avoid overly generic preschool statements.
- Use real classroom situations as content inspiration.
- Turn everyday activities into stories.

Example

❌ **Generic:**
“Children learn important social skills through play.”

✅ **Experience-based:**
“Today, two little friends decided to build one big tower together. What started as play became a small lesson in sharing, communication and teamwork.”

The second approach **shows the experience instead of simply explaining it.**

---

8. For Designers

Design direction

- Keep designs clean and child-friendly.
- Use real photographs wherever possible.
- Reduce dependency on AI-generated children.
- Avoid overcrowding creatives with text.
- Maintain consistent typography, colours and layouts.
- Create a **standard Reel cover system**.
- Create a consistent **Highlight cover system**.

Important

The design should support the **real Junior Toes identity**, rather than making every post look like a generic preschool advertisement.

---

9. For Video Editors

Video direction

Prioritise:

- Real classroom footage
- Natural child interactions
- Teacher-child interactions
- Activities
- Small funny/cute moments
- Learning moments
- Behind-the-scenes footage

Editing style

- Keep videos natural.
- Don't over-edit every Reel.
- Use subtitles where necessary.
- Start with a strong first 2–3 seconds.
- Keep the pacing engaging.
- Use appropriate trending audio when relevant.

- Maintain consistent Reel covers.

Most important:

Don't just show an activity. Show what the child is experiencing or learning through the activity.

---

10. Admission Creatives

Current issue to avoid

Admission creatives becoming too information-heavy.

Avoid putting:

- Multiple branch details
- Multiple phone numbers
- Too much text
- Too many CTAs

Instead create separate creatives:

Admissions Open
→ Simple admission message + CTA

Find Your Nearest Junior Toes
→ Branch/location-focused communication

Why Parents Choose Junior Toes
→ Benefits and differentiation

What Your Child Experiences Here
→ Real classroom/child experience

Detailed contact information can be provided through **captions, WhatsApp, website or landing pages**.

---

11. Festival Content

Avoid

Posting the same type of generic festival greeting for every occasion.

Instead

Connect the festival to **children + learning + Junior Toes**.

For example:

Instead of:

> “Happy Diwali! Wishing everyone happiness and prosperity.”

Create something around:

> **“This Diwali, little hands explored the joy of creating, sharing and celebrating together.”**

Then show the **actual Junior Toes children/activity**.

Festival content formula:

Festival → Child experience → Learning/value → Junior Toes

---
