What We're Doing Next Month

October SEO action roadmap

No.	Area	Action
01	Technical SEO	Monitor Google Search Console indexing, coverage, crawl issues and website health; implement required technical fixes.
02	On-Page SEO	Continue internal linking optimization across 15 blogs, connecting relevant keywords to specialty, diagnostic, condition and service pages.
03	Keyword Growth	Focus on improving rankings for priority hospital, specialty, treatment, diagnostic, location and near-Page-1 keywords, while continuously monitoring relevant search queries and identifying new keyword opportunities.
04	AI Search Optimizations	Expand FAQ content, structured information, entity signals and location-based content to strengthen Nano Hospitals' visibility across AI search and answer-based search results.
05	Analytics & Business Impact	Monitor Google Search Console performance, organic clicks, impressions, CTR and keyword growth to measure SEO progress.
06	Technical Fixes	Identify and address priority on-site SEO issues such as metadata, headings, duplicate content and other issues found during the monthly audit.
